

Session Variables

This is a superglobal variable.
This array is stored in the server.

How to start a session

```
session_start();
```

Starts a new session or resumes a previous one. Must be called before outputting any HTML.

How to create/modify a session variable

This is the syntax:

```
$_SESSION['var_name'] = value;
```

How to delete a session variable

a single variable:

```
unset($_SESSION['var_name']);
```

all session variables:

```
$_SESSION = array();
```

How to destroy a session

```
session_destroy();
```

Cookie Variables

An associative array of variables passed to the current script via HTTP Cookies.
A name/value pair stored in the browser. (User computer).

Set a cookie variable

```
setcookie(name, value, expire, path, domain, secure, httponly);
```

```
setcookie('myCookie', 'Ich bin Marco', strtotime('+1 year'), '/');
```

Get a cookie variable

```
$var1 = $_COOKIE['cookie_name'];
```

Destroy a cookie variable

```
setcookie('myCookie', '', strtotime('-1 year'), '/');
```
